List and think of their many life achievements related to family, work learning and others, including simply enduring and protecting their children and families, in what has been to date a widely unfair society in political and religious leadership. Your doing so restores their recognition as people who could have equally been in office and leading love alongside men of partnership but were often profoundly overlooked and excluded because humanity had not evolved enough to value the wisdom of women. This is the section to remember your family's Ruths, Naomis, Heras, Marys and the equivalents of our grandmother's hatshop and all their sisters. If you had grandmothers or she had sisters like, or who, with a bit more education and self-and-other esteem, could have been like Bella Abzug, Sojourner Truth, Elizabeth Cady Stanton, Susan B. Anthony and many others who have done so much for so many, and good the world would be right now if gender partnership had arrived during their lives. This is restorative time travel to go back to a better future starting with all those who remember them right now.**

List and think of their many life achievements, related to family, work learning and others, including simply enduring and protecting their children and families, in what has been to date a widely unfair society in political and religious leadership. We have highlighted the circle of extended family in this all equals ballot, because these connections are most weakened or unexplored, and sometimes not even thought of as potentials for mutual encouragement to coleadership in our atomistic, fragmented, overly-nuclear-familized and still patriarchal instead of partnership society that has not everywhere made the transition from patriarchy to gender partnership that is nevertheless occurring and underway, and inevitable if humanity is to survive let alone thrive. Include cousins, nieces and aunts by birth and by marriage here. Start with younger and about same age peers, because they have not become accustomed to old and passing habits yet, but be sure to also include older siblings and generations in this as a circle, for this will make it clear that no one is too old for coleadership and can be everyyoung as the human lifespan expands.**

These female relationships are profoundly important and often not thought of for mutual encouragement to coleadership in patriarchal society. When these relationships are mutually coempowering for coleadership it is a sign of profound and achieved social redemption. There are some well known herstorical examples such as the Blackwell sisters among the first women doctors and ministers, the Bronte sisters as great proponents of respect for the women in marriage, many lesser known but even more important people of the Panchayat Raj, a universal example that started in India. Their co-rise in democratic political and religious life, as partners not only with each other but even more important people, people like you and you, as sisters with each other as well as men, signifies important social restoration, and is now occurring, despite media propoganda, around the world, and can become typical among women.**

List and think of their many life achievements related to family, work learning and others, including simply enduring and protecting their children and families, in what has been to date a widely unfair society in political and religious leadership. Take your abilities of coleadership seriously. Remember the phrase, If I am not for myself, than who will be for me; if I am only for myself, then what am I; if not now, when (if this planet is to escape complete disaster. Peace and partnership begin with you and all you love. Knowing this is essential for women and girls. It is important for single women, and no woman (or man) is truly spiritually married until her society has achieved this. Thus, if you are a man, put your wife, fiancé's or girlfriend's name at the very top of the Sisterhood Redeemed List. THIS IS IMPORTANT FOR MEN (read more about this in the section Brotherhood Redeemed.)**
